SECTION III.— <i>Vital Statistics, Ajmer-Merwara.</i>	
Annual Form No. I, births registered	20
Annual Form No. II, Statement of Births and Deaths registered	20
Annual Form No. III, deaths registered	21
Annual Form No. IV, deaths registered according to age	22-23
Annual Form No. V, deaths registered according to classes	24
Annual Form No. VI, deaths registered from different causes in the districts	25
Annual Form No. VI (A), births in the Rural and Urban areas and deaths from different kinds of fevers	26-27
Annual Form No. VII, deaths registered from Cholera	28
Annual Form No. VIII, deaths registered from Small-pox	29
Annual Form No. IX, deaths registered from Fever	29
Annual Form No. X, deaths registered from Bowel complaints	30
Annual Form No. XI, deaths registered from Respiratory diseases	30
Annual Form No. XII, deaths registered from Plague	31
Annual Form No. XIII, deaths registered from Influenza	31
Statement showing the birth rate per mille of the population in the chief communities of Ajmer-Merwara	32

Statement showing deaths of infants under one year according to community in Ajmer-Merwara	33
Table showing the severity of the epidemics	33

SECTION IV.—*Vaccination.*

Statement No. I, showing particulars of Vaccination in Ajmer-Merwara	34
Comparative statement of deaths registered from Small-pox with vaccination done in Ajmer-Merwara	35
Statement No. I, showing particulars of Vaccination in Ajmer-Merwara and Rajputana	36-37
Statement No. IV, comparative statement of Vaccination in Rajputana and Ajmer-Merwara	38

PART II.

Hospitals and Dispensaries.

Section I.—Hospitals and Dispensaries in Ajmer-Merwara	40-45
Section II.—Hospitals and Dispensaries in Indian States of Rajputana	46-49
Section III.—Annual Statements for Hospitals and Dispensaries—	
Statement A, showing the number of Hospitals and Dispensaries in Rajputana	50
Statement C, showing the number of Indoor and Outdoor Patients treated in State-Public, Local Fund, Private-aided and subsidised Dispensaries of Rajputana	52-55
Statement D, showing the number of beds, number of indoor and outdoor patients and number of surgical cases and the geographical distribution of infectious and other diseases treated in all classes of Medical institutions in Rajputana	56-91
Statement E, showing the results of surgical operations performed in the State-Public, Local Fund, Private-aided and subsidised dispensaries	92-96
Statement F, showing the income and expenditure of State-Public, Local Fund and Private-aided dispensaries of Rajputana	97-101
Appendix I, showing the number of Indoor and Outdoor patients according to class and sex, treated in the State-Public, Local Fund and Private non-aided Dispensaries of Rajputana	102-103
Statement J, showing the account of invested capital of Dispensaries in Ajmer-Merwara	104
Statement No. XIV, showing the sickness and mortality among prisoners of all classes in the Jails of Rajputana	105-111

PART III.

SECTION I.—*Ajmer Jail.*

Review of the Ajmer-Merwara Jail Report for 1937	114-115
General summary showing the distribution of prisoners	116
Statement No. I, showing number and disposal of convicts	117
Statement No. II, showing religion, age, etc., of convicts	118
Statement No. III, showing the convicts admitted into Jail	119
Statement No. IV, showing the convicts admitted into Jail, who had been previously convicted	120
Statement No. V, showing escapes and recaptures of convicts	120
Statement No. VI, showing offences committed by the convicts and punishment inflicted	120
Statement No. VIII, showing the employment of convicts as prison officers	121
Statement No. X, showing the expenditure in guarding and maintaining the convicts	122
Statement No. XII, showing the employment of convicts	122
Statement No. XIII, showing the net cash earnings of convicts	123
Statement No. XIV, showing the net cost of prisoners	123
Statement No. XV, showing sickness and mortality among prisoners	124

	PAGES.
Statement No. XVI, showing admission and deaths from chief diseases among convicts	125
Statement No. XVII, showing mortality according to age among convicts	125
Statement No. XVIII (Vital), showing mortality among convicts according to the length of time passed in Jails	126
Statement No. XIX, showing particulars regarding prisoners under trial	126
Statement A, showing the nature and amount of accommodation of each prisoner	127
Statement B, showing the condition of prisoners discharged from Jail	127
Statement showing the nature of crimes for which convicts were imprisoned	128-130
SECTION II.—Jails in the Indian States	131

PART IV.

Public Health.

TABLE A.—Showing Health Services in Rural and Urban areas in Ajmer-Merwara and Rajputana States	134
TABLE B.—Showing Maternity and Child Welfare Centres, Health Visitors and Midwives in Rural and Urban areas in Ajmer-Merwara and Rajputana States	135
TABLE C.—Showing the distribution of Medical personnel in Ajmer-Merwara, Rajputana States, Agency Hospitals and Northern India Salt Revenue Dispensaries	136

PART I.
PUBLIC HEALTH AND VACCINATION.

Annual Report on the Hospitals, Dispensaries and State of Public Health in Rajputana (including Ajmer-Merwara) for the year 1937 and on Vaccination for the year 1937-38.

PART I.

SECTION I.

Public Health and Vaccination in Ajmer-Merwara.

CHAPTER I.

Meteorology, Economic conditions, i.e., prices of food grains, etc.

Rainfall in Ajmer-Merwara.—Rainfall in the District during the year was 22.77 inches as compared with 16.6 inches in the preceding year. On the whole it was not normally distributed.

Productions.—The production of the principal harvests during the year was :—

<i>Kharif</i> —										Maunds.
Maize	372,978
Bajra	94,203
Jawar	270,246
Cotton	247,209
<i>Rabi</i> —										
Wheat	23,988
Barley	1,449,291
Gram	203,729

The average prices of food grains per rupee were as under :—

										1937.	1936.
										Seers.	Seers.
Wheat	11	14
Barley	16	22
Maize	16	25
Gram	14	20
Cotton	2-6	2½

The economic condition was fair. The general depression in the rates of agricultural produce hit the economic condition of the people at large.

CHAPTER II.

Births and Deaths.

There were 21,983 births (11,963 males and 10,020 females) registered in the year 1937 as against 23,493 in 1936 showing a decrease of 1,510.

The birth rate per mille was 39.23 according to the population of 1931 census and 37.21 according to the mid-year estimated population for 1937 as compared with 41.92 and 40.21 respectively in the preceding year.

The following table shows the birth rate per mille of population for the chief communities in the district :—

Statement showing birth rate per mille of the population in the Chief Communities of Amer-Merwara (Hindus, Mohammadians, Christians and other communities) for the year 1937.

District.	Population for the census 1931 and mid-year estimated population for 1937.					Births Registered.				Ratio of births per mille of population.					
	Christians.	Moham- madans.	Hindus.	Others.	Total.	Christians.	Moham- madans.	Hindus.	Others.	Total.	Christians.	Moham- madans.	Hindus.	Others.	Total.
<i>Ajmer—</i>															
Census, 1931 . . .	6,401	73,483	329,180	14,545	423,018	126	2,685	13,113	127	19,230	19.52	38.08	39.79	8.73	38.28
Mid-year population, 1937 .	6,010	77,458	340,241	14,929	446,244						18.89	30.08	37.87	8.50	36.45
<i>Merwara—</i>															
Census, 1931 . . .	546	23,650	105,020	7,168	136,374	10	1,106	4,427	210	5,753	18.31	40.70	42.15	20.33	42.18
Mid-year population, 1937 .	570	26,120	112,003	7,238	145,531						17.54	42.34	39.31	20.01	39.20
Total census, 1931 . . .	6,947	97,133	434,509	21,703	560,292	135	3,971	17,540	337	21,983	19.43	40.88	40.86	19.52	39.23
Total mid-year population, 1937 .	7,186	103,678	458,844	22,167	591,775						18.78	38.33	38.22	19.20	37.14

The percentage of male to female births, was 119.39 during the year under report as compared with 113.26 in the previous year.

The birth rate exceeded the death rate by 7.74 per mille of population for 1931 and by 7.35 per mille of mid-year estimated population for 1937.

17,641 deaths were registered during the year against 14,086 last year resulting in an increase of 3,555.

Out of the total number of deaths reported 11,436 have been classified under the head "fever". The general practice of classifying deaths due to various diseases under this head still goes on. This is due to the fact that death reporters are mostly illiterate as has been pointed out in previous reports. It is hoped that all local bodies in the district entrusted with the duty of registering births and deaths will pay early attention to this important matter.

The death rate per mille of population for 1931 and mid-year estimated population for 1937 was 31.48 and 29.86 respectively as against 25.14 and 24.11 in the previous year.

The mortality under 5 years of age was 54.90 per cent. of the total deaths against 50.08 last year.

The mortality among children under 1 year of age was 28.17 per cent. of the total deaths as against 29.03 in the preceding year.

Deaths recorded from tuberculosis in the city and suburbs of Ajmer were 537 as compared with 560 in the year 1936.

CHAPTER III.

State of Public Health in the district and history of chief diseases.

The following comparative table shows the number of deaths from chief diseases :—

Name of disease.	Year.	
	1936.	1937.
1. Cholera	21	..
2. Small-pox	247	595
3. Influenza	1
4. Plague
5. Fevers	9,160	11,436
6. Dysentery and Diarrhoea	497	570
7. Respiratory diseases	2,363	2,339
8. Injuries	204	170
9. All other causes	1,574	1,930
TOTAL	14,086	17,641

Cholera.

No death occurred from this disease against 21 in the year 1936.

Small-pox.

During the year under review 595 deaths occurred from Small-pox against 247 last year, the rate being 1.06 and 1.00 per mille of population for census of 1931 and mid-year estimated population for 1937 respectively against .44 and .42 in the preceding year. The disease was prevalent mostly in the rural part of the district. It prevailed in epidemic form in the first half-year and subsequently declined. The highest mortality (*viz.* 142) was registered in the month of April 1937.

4 REPORT ON SANITATION, DISPENSARIES AND JAILS IN RAJPUTANA FOR 1937

71 deaths were registered in the urban area of the district showing a rate of .39 and .38 per mille of population for 1931 census and mid-year estimated population for 1937 respectively against 13 with a rate of .07 and .07 last year.

524 deaths were registered in rural areas with a rate of 1.37 and 1.28 per mille of population for 1931 census and mid-year estimated population for 1937 respectively as against 234 with a rate of .61 and .58 in the preceding year.

Influenza.

Only one case of Influenza was recorded in the rural part of the district.

Plague.

Fortunately the district remained free from this disease during the year under report.

Fevers.

The number of deaths from fevers was 11,436 against 9,160 in the preceding year with a rate of 20.41 and 19.35 per mille of population for 1931 census and mid-year estimated population for 1937 respectively against 16.34 and 15.68 during the year 1936. The mortality was highest in the months of April, August and September while lowest in the month of July 1937. Diseases such as Malaria, those of the Enteric group, Pneumonia and others characterised by high fever are registered under the head 'fever'. In addition there is a large proportion of deaths, the causes of which are not correctly ascertained and which are shown under this head according to the practice in vogue. This is due mostly to the fact that the death reporters are generally illiterate or persons of low educational qualifications.

In the Municipal towns 1,175 deaths were registered from 'fever' against 1,037 last year with the rates of 6.52 and 6.42 per mille of population of 1931 census and mid-year estimated population for 1937 respectively against 5.75 and 5.71 during the last year.

10,261 deaths were registered in the rural area of the district against 8,123 last year with the rate of 26.99 and 25.15 per mille of population for 1931 census and mid-year estimated population for 1937 respectively as against 21.37 and 20.16 in the preceding year.

Dysentery and Diarrhœa.

This group of diseases recorded 570 deaths as compared with 497 in the previous year. The highest mortality was registered in the months of May and August, as last year.

With the exception of 8 in the rural area all deaths were registered in the Municipal towns with a ratio of 3.11 and 3.07 per mille of population for 1931 census and mid-year estimated population for 1937 respectively as compared with 495 with a ratio of 2.74 and 2.72 in the year 1936.

More than $\frac{2}{3}$ rd of the total deaths were registered in the city of Ajmer as in the last year. This abnormally high rate of deaths in the city seems to be chiefly due partly to the insufficient and impure supply of drinking water by pipe line in the city and partly to the unsatisfactory state of affairs for the disposal of night soil, foul water and rubbish.

Respiratory diseases.

2,939 deaths with a mortality rate of 5.24 and 4.97 per mille of population for 1931 and mid-year estimated for 1937 respectively were registered during the year against 2,383 deaths with a rate of 4.25 and 4.07 in the year 1936.

2,930 deaths were recorded in the Municipal towns and 9 in the rural area as compared with 2,377 and 6 in the previous year.

As tuberculosis is not registered separately it is difficult to assess the trend of this terrible disease. It is spreading rapidly in the Municipal town of Ajmer

which is overcrowded and insanitary. However, the following special accommodation existed for tuberculosis at the Hospitals and Sanitoria noted below :—

		Beds.
(a) Victoria Hospital, Ajmer	{ males	10
	{ females	10
(b) Women's Mission Hospital, Ajmer, female		10
(c) Mary Wilson Sanitorium, Tilaunia, 24 miles from Ajmer, for women		80
(d) The Madar Sanitorium 3½ miles from Ajmer, for men		40

Both sanitoria (c) and (d) are within a couple of 100 yards of Railway station on the B. B. & C. I. Railway line between Ajmer and Delhi. They are managed and almost entirely supported by the American Methodist Mission. They are ideally situated in spacious grounds, in a healthy atmosphere. In addition to this several cases of tuberculosis of glands, bones and joints were admitted into the surgical wards of the two hospitals mentioned above. Regular tuberculosis clinics could not however be held for want of a Health Visitor who could not be obtained, in spite of the offer of an attractive salary, on account of the difficulty of obtaining medical staff to examine and diagnose the cases. At a meeting of the Anti-Tuberculosis Committee held during December 1937 the following arrangements were made : (1) Doctor M. L. Talwar, Medical Officer of Health, Municipal Committee, Ajmer, was sent to Calcutta to attend a Post Graduate Course in Tuberculosis organised by King George Thanksgiving (Anti-tuberculosis) Fund and (2) Doctor C. L. Anderson, who retired from Government service, is running a regular Tuberculosis clinic at the Victoria Hospital assisted by the staff of Hospital. Considerable work is being done in examining and diagnosing cases to their source in examining the contacts and reporting to the clinic.

Other causes of deaths.

The total number of deaths registered under this head was 1,930 as compared with 1,574 in the preceding year. The term "Other causes" includes a large number of diseases and it is impossible to assess the relative share played by each.

1,889 deaths in the Municipal town and 41 in the rural area were registered during the year under report against 1,546 in urban and 28 in rural areas in the previous year.

Leprosy.

Out of 35 patients treated at the Victoria Hospital clinic during the year 1937, 32 were outdoor and 3 indoor. All patients were adult and male except 6 females. 29 of them belonged to Ajmer-Merwara (15 belonged to Ajmer-Merwara proper and 14 were outsiders living in Dargah as beggars) and the remaining 6 patients to other provinces of India. In some cases lepra-bacilli were found on bacteriological examination from the smears taken from the nose and skin but as their attendance at the hospital was irregular no definite conclusion could be arrived at as to their progress.

Rabies.

Since November 1932 a centre for anti-rabic treatment has been working in the Victoria Hospital, Ajmer. 258 (221 indigent and 37 self-paying) patients belonging to Ajmer-Merwara and the surrounding states were treated at this centre during the year under report as compared with 432 (378 indigent and 54 self-paying) during the last year. A detailed report of the centre will be found at pages 44-45 of this report.

CHAPTER IV.

Epidemiology.

The district remained free from all epidemic diseases except small-pox. Six sporadic cases of Cerebrospinal fever occurred in the Ajmer Municipal area.

CHAPTER V.

Fairs and Festivals.

The two large religious fairs of Urs Khwaja Sahib and Pushkar were held as usual at Ajmer and Pushkar respectively. A large gathering of pilgrims attended both the fairs. Temporary dispensaries were opened during the fair days in the Dargah and at Pushkar. The total number of patients treated was 732 and 705 respectively at the Dargah and at Pushkar dispensaries.

Pushkar fair started on the 14th November 1937 and lasted for 5 days. In addition to the Sub-Assistant Surgeon in charge of the dispensary one more was deputed to supervise the Sanitary arrangements. Boy Scouts rendered assistance to the public in general. Necessary precautionary measures against the outbreak of epidemic diseases were taken and happily no epidemic occurred.

CHAPTER VI.

Urban Sanitation (including notified areas), Municipal water supplies, etc.

The sanitary condition of the Ajmer city continued to be far from satisfactory. Nothing has been done to improve the water supply which continues to be inadequate and impure. The arrangements for the removal of night soil, foul water and rubbish are still inadequate. The compost system has been introduced and the product is put to sale. During the year 1937-38 about 14 thousand running feet of drains were provided at the Municipal expense and about 21 thousand running feet at the expense of the people. In the year 1937 the Public Health Commissioner with the Government of India (Col. A. J. H. Russell, C.B.E., K.H.S., I.M.S.) paid a visit to Ajmer and suggested that the health problems of Ajmer may be considered under the following heads:—

- (a) Water supply ;
- (b) Drainage and disposal of sullage ;
- (c) Night soil and sewage removal and disposal ;
- (d) Town planning and open spaces ;
- (e) Town extension areas ;
- (f) Hospitals and dispensaries ; and
- (g) Health organization.

The sanitary arrangements of the Beawar town remained in the same condition.

The position with regard to housing in each of the urban areas of Ajmer, Beawar, Nasirabad and Kekri is as follows:—

Ajmer.—New building bye-laws were approved by the Hon'ble the Chief Commissioner in August 1937 and it is hoped that a marked improvement will now be apparent within a few years.

Town planning is in force. Several of the unbuilt areas have been town-planned. At present new houses are mostly being constructed close to the existing houses on plots of land that were purchased for this purpose some years ago. As existing buildings are usually back to back and with 12' or 15' roads in front of them, this frequently results in the new houses being much smaller than an owner originally wished to build and out of line. The problem is to strike a mean between compelling a prospective builder to construct a house with adequate ventilation and means of approach or of building a house on a smaller scale that results in over-crowding within the building. So far as possible 128 service lanes are provided at the backs of houses and not less than 25' roads in front of them. In some new areas roads of 40' and 30' width are provided as secondary road with 12' service lanes.

As regards the co-operative house building societies the number remained the same, *viz.*, 9 as last year.

The Adarshnagar House Building Society, though it has been in existence for the last 5 or 6 years only, is making steady progress. The members are taking keen interest in its affairs. The houses constructed are of modern fashion and well ventilated. Due regard has been paid towards cleanliness and sanitation in these houses.

Beawar.—Houses in this town are in almost all cases of the Haveli type in which many families live. People have now begun to realise the necessity of fresh air and proper ventilation. The houses now constructed by middle class persons are of a better type and design but still require further improvements with respect to ventilation and light. The tendency to live outside the town is growing among educated persons and some new houses have been constructed outside the city walls.

The labour quarters of the mill area are in the same old condition as was reported last year.

Building bye-laws, it is expected, will shortly be framed by the Municipal Committee on the lines of Ajmer bye-laws.

Nasirabad.—Housing in Nasirabad is regulated by the Cantonment Act and the bye-laws framed thereunder. Due to the rigid enforcement of building bye-laws by the Cantonment authorities, housing conditions in Nasirabad are in some respects better than in Ajmer and elsewhere.

Kekri.—Nothing has been done in the matter in this Municipality.

CHAPTER VII.

Rural Sanitation and Housing.

The rules for the improvement of village sanitation continued to be in force in certain villages of the district but nothing is being done to improve the living conditions of the rural population. The matter is still under consideration by the Government of India and it is hoped that something will be done to ameliorate the conditions of living in the rural areas.

Little attention appears to have been paid so far to the problem of "Housing" in Ajmer-Merwara. In rural areas there are no building societies. In the rural area of Ajmer the village co-operative societies have advanced 22 loans amounting to Rs. 1,478 for house building purposes but the amount has been utilised chiefly by the villagers residing in the neighbourhood of Ajmer in repairing their houses and converting kutcha dwellings into pucca ones. The 16 co-operative Better Living Societies started by Better Living Propagandists are doing their best to improve the sanitation of the villages in which they are situated.

The District Board has done little for sanitation in these areas. In fact the District Board does not regulate construction of houses in the rural areas of the district. It is hoped that with the introduction of the Rural Development Scheme the District Board will be able to do something to improve sanitation in the rural areas. Comparatively speaking, the health of the rural population during the year was satisfactory on the whole.

CHAPTER VIII.

Malaria.

During the year 18,371 cases of malaria were treated against 13,561 in the preceding year. The Sub-Committee formed to carry out a survey and anti-malarial campaign in the Ajmer city area are doing satisfactory work particularly in co-relating the efforts of the various bodies doing anti-malarial work in the area.

CHAPTER IX.

Maternity and Child-welfare.

During the year under report the branches of the Lady Chelmsford League for maternity and child-welfare functioned at the places named below :—

Ajmer.—Child-welfare and Maternity work was carried on at the Dai Khana, Ajmer, by a European Matron with one fully trained assistant under the supervision of the lady doctor in charge of the Women's Scottish Mission Hospital, Ajmer.

At the commencement of the year there were 10 dais in the Dai Training Class. 10 new pupils joined the class making a total of 20 in all. Out of these 10 pupils left and thus there remained 10 at the close of the year. 4 pupils in the 2nd year (final) and 4 in the 1st year were examined and declared passed. The dais who left had come from :—

Jodhpur	3
Bikaner	1
Jhalawar	2
Shahpura	1
Ajmer	3

The training of dais is supported by the Queen Victoria Memorial Scholarship Fund. The work consists of the treatment of patients in clinics at the Centre and at their homes.

During the year the following visits were paid by the Health visitors :—

	1st visit.	Revisits.	Disclinic.
<i>Centre Visits—</i>			
Antenatal cases	881	1,716	547
Babies	395	2,085	485
Toddlers	200	3,656	399
Gynaecology cases	253	139	..
<i>Home Visits—</i>			
Antenatals	1,522
Labour	41
Postnatals	365
Babies	1,671
Toddlers	610

1,091 cases were treated as indoor patients against 1,094 in the previous year :—

Kind of cases.	1937.	1936.
Antenatals	197	210
Mothers	454	458
Babies	434	426
Other cases	6	..
TOTAL	1,091	1,094

560 labour cases were attended to at the Maternity Home. 41 cases at the patients' house and 67 were taken to the Women's Mission Hospital.

104 abnormal cases were attended to in the Maternity Home and 67 sent to Mission Hospital.

Deaths in the Home were as follows :—

12 babies of premature births and 16 still births.

The total amount spent during the year by this centre was Rs. 10,981-1.

Nasirabad.—The welfare work was managed by a Committee consisting of about 18 members. There was no health visitor nor a nurse specially kept for this work. The staff of the Women's Mission Hospital rendered some services.

Kekri.—Welfare work in Kekri has come almost to a stand-still since 1936 as the Sub-Divisional Officer of the place did not wish to carry it on.

Tadgarh.—As a branch was opened only a few months back no particular work of any importance could be undertaken.

CHAPTER X.

School Hygiene and Medical inspection of school children.

No regular scheme for the medical inspection of school children has so far been introduced in the District for want of funds. There are a few schools which have some sort of medical inspection for their children. In the Government High School, Ajmer, at the annual inspection a thorough examination from every aspect was done, and every one with any ailment which was likely to result seriously, was weeded out and kept under special supervision, entered in a special register and parents duly informed. Advice regarding diet, exercise and treatment both preventive and curative was also given at the time of inspection.

The average attendance at the school clinic was 40 which included ulcers, wounds, Bronchitis, Influenza, abdominal pain, headaches, etc.

The doctor in charge of the Central Jail, Ajmer, looks after the health of the boys in the Government Normal School which is a residential one. He visits the school twice a week and provides facilities to students to consult him on any other day, if needed. The school has a small dispensary of its own. The doctor treated 204 patients in the year under report. The school was free from contagious or infectious diseases. For the sake of the students' health the school has the system of compulsory evening games and physical drill exercises every day in the morning.

The additional Civil Surgeon and the Assistant Surgeon visit the Government College and the Government High School Hostels to look after the general health of the students and other inmates.

There is no regular medical inspection system in the Moinia Islamia High School, Ajmer, but for the last one or two years the school has been maintaining records of boys with regard to height, weight, chest, etc.

Almost all important schools hold Junior Red Cross classes and Ambulance work is also done at some centres. Such classes are also held in rural Secondary Schools where Sub-Assistant Surgeons are available.

Hygiene forms part of the subjects of the curriculum meant for Anglo Vernacular schools.

CHAPTER XI.

Health propaganda, Red Cross Society.

The Ajmer-Merwara district branch of the Indian Red Cross Society worked under the Secretaryship of Rai Sahib P. B. Joshi and Joint Secretaryship of Dr. M. L. Talwar.

The Rajputana Provincial Branch of the India Red Cross Society gave grants as usual in cash to several hospitals, dispensaries and welfare centres in Ajmer-Merwara, the training of nurses and dais was continued and the society contributed towards their pay.

Miss Norah Hill, the Organising Secretary of the All India Red Cross Society, paid a visit in August 1937 and during her stay in Ajmer for 2 days she visited

six boys' and girls' schools to see their Junior Red Cross Group activities. Her remarks are useful to workers in future for enabling them to direct their energies on correct lines.

Out of the District Branch share of the Silver Jubilee Fund, a contribution of Rs. 15,770 was made towards the construction of a Maternity home proposed to be built in Ajmer. This work has been entrusted to a Special Committee.

CHAPTER XII.

Public Health Administration.

The strength and distribution of the health services including trained midwives and nurses for Rural and Urban areas was as under :—

	Rural.	Urban.
Medical Officer of Health	1
Chief Sanitary Inspector	1
Death verifying doctor (M. B. B. S.)	1
Indian Superintendent of Vaccination	1 for both areas.
Vaccinators	10	6
Sanitary Inspectors	11
Veterinary Assistant	2 for both areas.
Malaria Inspector	1
Slaughter House Superintendent	1
Stable Superintendent	1
Sanitary Jamadars	24
Midwives	2
Trained Dais	2
Trained Health Visitor	1

There is no regular Public Health department for the rural area as in the Provinces of the British India and it is very desirable that such a department be created as early as possible.

CHAPTER XIII.

Vaccination (1937-38).

The total number of persons vaccinated in Ajmer-Merwara (including the Nasirabad Cantonment) was 30,723 (15,739 in rural and 14,984 in urban areas) against 24,931 (13,209 in rural and 11,722 in urban areas) during the last year showing an increase of 5,792.

During the year under report the total number of primary vaccinations was 27,065 (15,731 in rural and 11,334 in urban areas) against 22,025 (13,202 in rural and 8,823 in urban areas), and that of primary successful vaccinations 26,508 (15,643 in rural and 10,865 in urban areas) against 21,218 (13,146 in rural and 8,072 in urban areas), in the preceding year.

The aggregate of both primary vaccinations and revaccinations was 30,948 (15,745 in rural and 15,203 in urban areas) in comparison to 25,350 (13,231 in rural and 12,119 in urban areas) during the last year showing an increase of 5,598.

The number of Vaccinators employed during the year was the same as last year, viz., 10 in rural and 6 in urban areas of the district. The average number of vaccinations performed by each vaccinator was 1,920 as against 1,558 in the preceding year.

The number of persons successfully vaccinated per mille of population was 53·75 (41·17 in rural and 80·28 in urban areas) as compared with 43·37 (34·64 in rural and 61·78 in urban areas) in the previous year.

During the year under review the total expenditure was Rs. 8,127-9-9 and the average cost of each successful vaccination was 52 pies as compared with 8,213-9-6 and 65 pies respectively in the preceding year.

R. KHAREGAT, LT.-COL., I.M.S.,
Civil Surgeon, Ajmer-Merwara, Ajmer.

PART I.

SECTION II.

Public Health and Vaccination in Indian States of Rajputana.

The narrative portion of the Annual Report for the year 1937 has not been received from the following States :—

- | | |
|----------------------|--------------|
| 1. Alwar. | 5. Palanpur. |
| 2. Danta. | 6. Shahpura. |
| 3. Dholpur. | 7. Tonk. |
| 4. Lawa (Chiefship). | |

CHAPTER I.

Meteorology, Economic conditions, etc.

Rainfall.—With the exception of Bundi, Kotah, Partabgarh, Banswara, Dungarpur and Sirohi, the rainfall during the year was generally less than that of the previous year.

The highest rainfall recorded at various places is shown as follows :—

	Inches.
Abu Road (Sirohi)	60.23
Bharatpur	14.27
Banswara	50.89
Bundi	22.10
Bikaner	12.32
Dungarpur	70.85
Jaipur	17.80
Jhalawar (Bhawanigunge)	51.84
Kishangarh	18.32
Kotah	44.26
Karauli	23.10
Partabgarh	45.72

The table below shows the maximum and minimum temperatures recorded during the year 1937.

Name of observatory.	Maximum temperature.	Recorded on	Minimum temperature.	Recorded on
Bharatpur	110° F.	7-6-1937	39° F.	15-1-1937
Kotah	114° F.	18-5-1937	39.1° F.	14-1-1937
Dungarpur	113° F.
Jhalawar	112.4° F.	18-5-1937	31.8° F.	6-1-1937
Kishangarh	112° F.	16-6-1937	38° F.	7-1-1937
Sirohi	112° F.	..	43° F.	..
Jaipur	118.8° F.	18-5-1937 and 7-6-1937	34.6° F.	14-1-1937
Karauli	110° F.	27-5-1937	56° F.	15-1-1937

Prices of food grains remained more or less constant throughout the year. There was no appreciable change in economic conditions from those of previous years.

CHAPTER II.

Vital Statistics.

A comprehensive and efficient system of recording vital statistics has not yet been introduced in the States of Rajputana. In some States no record is kept. In others records are maintained only in the principal towns. The following Table shows the birth and death rate per mille of the population :—

Name of place.	1937.				1936.			
	Birth.	Death.	Rate of birth.	Rate of death.	Birth.	Death.	Rate of birth.	Rate of death.
Bharatpur State	11,790	8,285	13,216	9,132	27.14	18.75
Bikaner City	501	931	6.60	12.27	528	1,456	6.96	19.20
Bikaner District towns	725	664	5.58	4.97	985	897	7.38	6.70
Jaipur City	4,307	5,462	37.88	29.87	4,666	5,455	32.36	37.83
Karauli State	1,860	1,905	13.57	12.80	1,904	1,839	13.54	13.08
Kotah State	24,958	20,102	24,441	13,668	36.63	19.49
Kushalgarh Chiefship	148	254
Partabgarh State	2,029	1,769	2,074	1,604	27.09	20.95
Sirohi State (3 Municipal towns)	57.84	49.02	62.53	34.95

Births.

Bharatpur.—The total number of births recorded in Bharatpur State was 11,790, as against 13,216 in the preceding year.

Bikaner.—The total number of births recorded in Bikaner City was 501, giving a ratio of 6.60 per mille of population, as compared with 528, with a ratio of 6.96, in the previous year.

The total number of births recorded in district towns was 725, giving a ratio of 5.58 per mille of population, as compared with 985, with a ratio of 7.38, in the previous year.

Jaipur.—The total number of births recorded in Jaipur City was 4,307, giving a ratio of 37.88 per mille of population, as compared with 4,666, with a ratio of 32.36, in the previous year. The records of births in the remainder of the State are reported to be incomplete.

Karauli.—The number of births registered was 1,860, as against 1,904 in the previous year. The ratio per mille of population was 13.57 and 13.54, respectively.

Kotah.—24,958 births were registered in Kotah State as against 24,441 in the previous year.

Sirohi.—Births, the figures of which have not been reported, were recorded only in three municipal towns. The rate is said to be 57.84 per mille of population, as against 62.53 in the preceding year.

The total number of births registered in Partabgarh State and Kushalgarh Chiefship was 2,029 and 148, respectively.

Deaths.

Bikaner State.—The total number of deaths recorded in Bikaner City and district municipal towns were 931 and 664 respectively as against 1,456 and 897 in the year 1936, giving per mille of population a death rate of 12.27 in Bikaner city and 4.97 in district towns as against 19.20 and 6.70 respectively in the preceding year.

Jaipur.—5,462 deaths were recorded in Jaipur City during the year under report, as against 5,455, giving a death rate per mille of population of 37.88 as against 37.83, in the preceding year.

More than half of the total mortality occurred among children under 5 years of age. The months of highest mortality were May, June and December.

Karauli.—The number of deaths recorded was 1,805, as against 1,839, giving a ratio of 12·80 per thousand of population as compared with 13·08 last year.

The total number of deaths registered in Partabgarh State and Kushalgarh chiefship were 1,769 and 254 respectively.

CHAPTER III.

State of Public Health and History of Chief Diseases.

The chief diseases from which deaths occurred in Jaipur City and Kotah State were :—

Name of disease.	Jaipur City.	Kotah State.
Plague	1 (imported case)
Cholera	37
Cerebrospinal fever	3
Small-pox	21
Measles	33	270 (measles and small-pox).
Fevers	1,960	17,812
Respiratory diseases	893
Other causes	1,755	353
Diseases of stomach	588

Similar information in respect of other States is not available.

In Sirohi State it is reported that the three main causes of deaths from disease are fevers, and abdominal and respiratory diseases. Much of the sickness and mortality are due to diminished power of resistance and to insanitary habits and surroundings. Eye and skin diseases widely prevailed. Guineaworm is also prevalent in those parts of the State where Baoris or step-wells exist.

Leprosy.—In Mewar State 30 cases (28 outdoor and 2 indoor) of Leprosy were treated. As these patients were irregular in their attendance no results as to the effect of their treatment could be obtained.

Out of 8 cases treated at the outdoor clinics of dispensaries in the Sirohi State only one derived some benefit.

5 cases were treated at the outdoor clinic in the Abbott Hospital, Jhalawar.

Rabies.—Information about anti-rabic work done has been received from the following Centres in Rajputana :—

- | | |
|---------------|-------------|
| 1. Alwar. | 5. Kotah. |
| 2. Bharatpur. | 6. Karauli. |
| 3. Jaipur. | 7. Mewar. |
| 4. Jodhpur. | 8. Sirohi. |

In Alwar 37 patients were treated.

84 patients were treated at the Centre at Bharatpur. Of these 54 received complete treatment, 22 left with incomplete treatment and 8 were given advice only as anti-rabic treatment was not considered necessary in those cases.

84 cases were treated at the anti-rabic centre at the Mayo Hospital, Jaipur.

107 out-patients attended the anti-rabic centre at Jodhpur but many of them did not accept treatment.

229 cases were treated at the anti-rabic centre attached to the City Hospital, Kotah.

13 cases were treated in Karauli State in the outdoor department of the Sadar Hospital.

In Mewar 147 cases of all classes were treated as compared with 106 in the previous year.

In the 2 centres in Sirohi State 10 cases of rabies were treated with success as against 19 in the preceding year.

CHAPTER IV.

Epidemiology.

Bharatpur.—This State accounted for one case of cholera, 8 cases of enteric fever and 3 cases of cerebrospinal fever. There was no mortality. There were 22 cases of small-pox out of which 4 proved fatal.

Bikaner.—There was no epidemic disease except a few sporadic cases of small-pox.

Jaipur.—The State was free from epidemic diseases with the exception of (a) a few stray cases of small-pox in 16 villages and towns of Jaipur State including the city proper and of (b) cholera in a milder form in the city of Jaipur, Chomu and its surrounding Dhanies and small villages. In Jaipur City cholera prevailed from the middle of July to 1st week of September.

The total number of cases of epidemic diseases reported by Medical Officers of hospitals and dispensaries in the State was as follows:—

	Cases.	Deaths.
Enteric group	117	Not known
Influenza	65	Not known
Plague	1 imported	1 death
Cholera	66	37
Small-pox	141	21
Cerebrospinal fever	11	3

The figures below show the preventive work done in connection with notifiable diseases:—

Number of houses disinfected	50
Number of wells disinfected	1,170
Number of anti-cholera inoculations performed	228

Jodhpur.—Only two cases of cholera occurred.

Jhalawar.—Previous year's small-pox epidemic continued till the end of March. The total number of cases registered was 129.

Other States record freedom from epidemic diseases.

CHAPTER V.

Fairs and Festivals.

Fairs and festivals were held as usual in the various States of Rajputana during the year under review.

The fairs which required special medical and sanitary arrangements were:—

Jaipur.—

- (1) Jeewan Mata fair in Sheikhawati.
- (2) Mahabir fair in Nizammat Hundaun.

Jhalawar.—

- (1) Kartik cattle fair on the bank of Chandrabhaga river at Patan;
- (2) Baisakhi cattle fair at Madan Sarowar, and
- (3) Ram Naumi cattle fair at Rajendrapur Mandi, Cahumahla Station.

Arrangements for medical aid were sufficient and no epidemic occurred.

Kotah—

- (1) Dasherai fair at Kotah.
- (2) Dol fair at Baran.
- (3) Shivratri fair at Manoharthana.
- (4) Sitabari fair.
- (5) Cattle fair at Suket.

The Dasherai fair lasted for more than 15 days. A temporary dispensary was opened at the fair ground where 883 patients were treated. Every precaution against the outbreak of epidemic disease was taken as usual.

*Marwar—*Three cattle fairs.

Mewar—

- (1) Rakhadeoji fair in March.
- (2) Martikund fair in May.
- (3) Charbhujaji fair in September.

Partabgarh—

- (1) Gotamnath fair in the middle of summer and
- (2) Ambamata fair.

Dungarpur—

- (1) Bijay Mela.
- (2) Beneshwar.

Arrangements for medical aid were sufficient and no epidemic occurred.

CHAPTER VI.

(Urban Sanitation including notified areas.)

Municipal water supplies.

The sanitary condition of the chief cities in the States of Rajputana is reported to be improving. There is practically no improvement in that of the district towns. Water supply in most of the towns is unsatisfactory.

In Bundi City the whole of the Bazar has been stone paved and roads are regularly sprinkled with water.

The water supply in Jaipur City is under the supervision of the staff of the Central State Laboratory of the Medical Department. Water is treated and purified by a filtration plant of up-to-date type. Filtered water is supplied at the rate of 8.8 gallons per head per day to Jaipur City as against 8.4 gallons in the preceding year.

The general sanitation of Jaipur City is being improved on modern lines. Automatic self-flushing urinals have been constructed for public use.

In the city of Kotah filtered water is supplied to the public.

The source of water supply in Sirohi State is from deep wells which are periodically treated with Potash Permanganate and by chlorination. Step wells have been converted into draw wells with the object of removing existing guineaworm infection.

CHAPTER VII.

Rural Sanitation.

Little or nothing is being done for the improvement of village sanitation in many of the States of Rajputana. In some of the larger States, however, new

schemes for Rural Development are being taken in hand, so that an appreciable improvement in the state of rural sanitation may be looked forward to in future. One of the States which has introduced such a scheme is Jaipur where the Revenue Department is taking an active part in co-operating with the State Medical Department in introducing public health measures.

Pertabgarh State.—The revenue authorities, *i.e.*, Girdawars, Patwaries, etc., concentrate on the removal of manure, excreta, etc., from within inhabited areas to sites where it can be trenched and stored for agricultural purposes.

In Sirohi State rural sanitation is being supervised by Medical Officers who also give lectures to villagers on elementary hygiene and prevention of disease.

The health of the rural population so far as reported, is satisfactory.

CHAPTER VIII.

Malaria.

Malaria is common in every part of the Indian States of Rajputana. During the year 445,660 cases of malaria were treated as against 433,217 in the previous year.

In some of the States anti-malarial measures were carried out. Quinine and Cinchona powders were distributed free to the general public through Tahsildars, Sub-Inspectors of Police, Taluqdars, Patwaries, etc.

CHAPTER IX.

Maternity and Child Welfare Activities.

Maternity and Child Welfare work was carried out at Bharatpur, Jaipur, Jhalawar, Jodhpur, Kotah, Sirohi and Tonk.

Bharatpur.—The following are the details of work done in the Child Welfare Committee :—

Number of children inspected by the L. H. V.	5,774
Number of children attended at the centre	17,269
Number of children treated at the centre	5,383
Labour cases conducted by the Lady Health Visitor	24
Labour cases conducted by Dais and supervised by the Lady Health Visitor	2,263
Number of Orphans on the roll before 1st January 1937	9
Number of Orphans admitted from 1st January 1937 to 31st December 1937	11
Number of Orphans discharged	9

Jaipur.—There are two child welfare centres in the city which are maintained by the State through a Child Welfare Committee as in the previous year. They are supervised by the President of the Committee and the Medical Officer of Health. The personnel consists of a Health Visitor, one Midwife and other servants.

The table below shows the work done in these Centres :—

Total attendance	225
Number of babies given baths	7,823
Number of antenatal cases attended at the Centre	226
Number of antenatal cases seen at the home	469
Number of confinements done in the maternity home	9
Number of confinements done in the city	49
Number of postnatal cases attended in the city	932
Number of postnatal cases attended in the homes	635
Number of needle work classes for mothers of girls	452
Number of lectures	35

Jhalawar.—There is a Maternity Child Welfare Centre in Brijnagar. A midwife is employed in the Centre who attends a considerable number of delivery cases free of charge. A course of lectures on first aid to the injured has been started in all the English Schools.

Jodhpur.—It is reported that the local branch of the Lady Cholmsford League had a very successful year, a larger number of cases having been dealt with than in the previous year.

Kotah.—The work of the two Child Welfare Centres in the city was as usual carried out by a sub-committee of ladies under the auspices of the Local Indian Red Cross Society. Every month babies were weighed and examined at the Centre and their mothers advised with regard to child rearing, etc. Glaxo and Ostelin with Vitamin D worth Rs. 357-15-3 were distributed regularly to weak babies. Miss Norah Hill, Organizing Secretary of the Indian Red Cross Society, gave lectures to local ladies on health subjects which were much appreciated.

Sirohi.—Maternity and Child Welfare work was carried out by a Lady Doctor with 2 Midwives and Nurses who attend confinements amongst the poor giving necessary advice to prospective mothers with regard to the management of pregnancy and to improved methods of rearing children.

Tonk.—A baby show was held in the Centre on the 5th and 6th April when children on the regular roll and from the city were judged and prizes distributed amongst them. The work of the centre was carried out by a Matron with 2 dais. The Maternity work was much appreciated by all classes of people and the institution is reported to be growing more and more popular.

No reports have been received from other States.

CHAPTER X.

School Hygiene and Medical Inspection of School Children.

A school medical officer and woman doctor examine boys of the different schools and colleges, both for boys and girls in Jaipur City. Medical inspection has been extended to boys' schools in the districts and is being conducted by the medical officers in charge of district dispensaries as in the preceding year. The parents of such students whose health was found to be defective were advised accordingly and cases of infectious diseases were brought to the notice of the school authorities concerned and the State Public Health Department.

The school medical officer at Jaipur gave 5 magic lantern demonstrations to boys of the city schools.

Jodhpur.—The medical inspection of school children by the school medical officer and Red Cross doctors continued this year as usual. The Rajputana Schools First aid tournament was held in Jodhpur in September for the 1st time, which was the chief activity of the local branch of the Indian Red Cross Society.

Kotah.—As usual lectures on First aid to the injured were delivered to students in most of the schools. 321 students appeared at the various examinations of St. John Ambulance Association and 187 passed and received certificates. Arrangements for athletic sports and games are satisfactory in all schools of the State.

Parbhagarh.—The general health of the students was good during the year. The periodical medical examination proved useful in bringing about an improvement in the general health of the boys.

Sirohi.—Sanitary condition of schools was found satisfactory and medical inspection was done twice a year as usual. Measurements were recorded of the height, weight and chest of all boys and defects were pointed out to their guardians. First aid was taught in schools. Boy-Scouts are reported to be doing excellent work in Sirohi.

CHAPTER XI.

Health propaganda.

The Rajputana Provincial Branch of the Indian Red Cross Society continued its activities under the Secretaryship of R. B. Shiv Charan Das. Grants as usual

were given in cash to several hospitals, dispensaries, etc. Rs. 50 and Rs. 400 were contributed towards the relief of sufferers in Spain and the Anti-Tuberculosis clinic to be opened at Ajmer, respectively.

There are 6 branches working under the Rajputana Provincial Branch, namely, Ajmer, Udaipur, Tonk, Bundi, Jhalawar and Dholpur. They are working satisfactorily but there is still room for improvement.

The total receipts of the branch were Rs. 6,941 and expenditure amounted to Rs. 6,728.

The Ajmer District Branch organized a Red Cross Day this year. This was the second of its kind in the annals of the District Branch. The Women's day was held on the 23rd and the Men's day on the 24th January 1937. The day was a successful one and brought a substantial income of Rs. 2,150 to the funds of the Society.

CHAPTER XII.

Public Health Administration.

The strength and distribution of health services including trained midwives, etc., for rural and urban areas were as under :—

	Rural.	Urban.
1. Medical Officer of Health holding D. P. H.	3
2. Medical Officer of Health (L. P. H. S.)	6
3. Sanitary Inspectors	3	30
4. Inspectors of Vaccination	13
5. Vaccinators	186	41
6. School Medical Officers	29	8
7. Epidemic Staff	1	..
8. Health Visitors	1	3
9. Trained Midwives	4	13
10. Trained Dais	31	14
11. Other Health Staff	29	..

CHAPTER XIII.

Vaccination (1937-38).

During the year under report the number of persons vaccinated in the States was 368,459 against 349,209 in 1936-37. 3,21,508

The total number of primary vaccinations was 360,578 of which 344,892 were successful against 340,380 primary and 310,198 successful operations in the preceding year.

30.03 per thousand of population in States were successfully vaccinated against 28.48 during the previous year.

The average number of vaccinators employed and the persons vaccinated by each vaccinator was 212 and 1,738 respectively as compared with 209 and 1,670 during the last year.

The total expenditure on vaccination in the States amounted to Rs. 97,645 against Rs. 95,838 in the preceding year. The average cost of each successful case was 54 pias.

JOHN P. HUBAN, LT.-COL., I.M.S.,
Administrative Medical Officer in Rajputana.

SECTION I.

Hospitals and Dispensaries in Ajmer-Merwara.

Ajmer-Merwara is a small part of British India in the centre of Rajputana with an area of 2,710-680 square miles and a population of 560,292. There are only 5 towns, viz., Ajmer, Beawar, Nasirabad, Kekri and Deoli with populations of 119,524, 28,342, 21,397, 7,179 and 3,757 persons, respectively.

The rural area consists of 457 Khalsa villages with a population of about 200,000, 50 Jagir villages with a population of about 30,000 and 240 Istimrari villages with about 150,000 inhabitants.

There are no public Government hospitals and dispensaries in Ajmer-Merwara. The medical facilities consist of State-aided Hospitals and Dispensaries in rural and urban areas, one Mission Women's Hospital at Ajmer, one Municipal Female Hospital at Beawar and one Municipal Dispensary at Ajmer.

The year under report opened and also closed with 10 State-aided hospitals and dispensaries, out of which 6 are in urban and 4 in rural areas.

The strength and distribution of medical personnel in State-aided and Municipal Hospitals and Dispensaries for rural and urban areas were as under :—

	Rural.	Urban.
Indian Medical Service Officers	1 Incharge of both rural and urban areas.
Indian Medical Department Officers	1
Assistant Surgeons	2
Lady Assistant Surgeon	1
Sub-Assistant Surgeons	4	9
Lady Doctors	1
Compounders	4	27
Nurses (Indian and European)	2	12
Ward attendants	2	19

The sub-joined table gives the details of total number of patients (both indoor and outdoor) treated in the hospitals and dispensaries in Ajmer-Merwara during the years 1936 and 1937 :—

Year.	CASES TREATED.		Total.	DAILY AVERAGE.		Percentage of indoor to total treated.	Deaths of inpatients.	Percentage of deaths to inpatients.
	Indoor.	Outdoor.		Indoor.	Outdoor.			
1936 . .	3,520	184,782	188,302	177-55	1,513-34	1-86	165	4-63
1937 . .	3,827	196,006	199,833	184-35	1,640-43	1-91	102	5-03

The number of indoor and outdoor patients increased by 307 and 11,224 respectively, from the previous year. The number of patients treated at each dispensary is given below :—

No.	Name of dispensary.	OUTDOOR PATIENTS.		INDOOR PATIENTS.				Difference of outdoor figures (—or+).	Difference of indoor figures (—or+).
				Cases.		Deaths.			
		1936.	1937.	1936.	1937.	1936.	1937.		
1.	Ajmer Victoria Hospital	34,184	36,397	1,878	2,115	138	163	+2,213	+237
2.	Kekri Dispensary	11,558	13,360	170	164	2	3	+1,802	—0
3.	Pisangan Dispensary	9,015	10,286	+1,241	..
4.	Bhlnai Dispensary	13,295	13,804	102	116	1	..	+509	+14
5.	Masuda Dispensary	13,731	15,738	143	126	1	1	+2,005	—17
6.	Beawar Hospital	39,854	38,222	771	701	17	21	—1,632	—70
7.	Todgarh Dispensary	6,758	8,852	119	223	2	..	+2,094	+104
8.	Ajmer Police Hospital	3,072	2,594	283	311	2	1	—478	+28
9.	Ajmer Municipal Dispensary.	45,478	48,563	+3,085	..

TOTAL		184,782	196,006	3,520	3,827	105	192	+11,224	+307

The table below shows the details of indoor and outdoor patients treated in Ajmer-Merwara dispensaries according to classes and sexes.

Caste.	1936.			1937.		
	Male.	Female.	Total.	Male.	Female.	Total.
Europeans and Anglo-Indians	152	105	257	89	107	196
Mohammadans	36,959	18,380	55,339	39,948	19,469	59,417
Hindus	86,539	39,506	126,045	92,677	41,796	134,473
Others	4,279	2,322	6,601	3,645	2,102	5,747
TOTAL	127,929	60,373	188,302	136,359	63,474	199,833

The figures of the chief diseases treated are as under :—

Names of diseases.	1936.	1937.
Malaria fever	13,561	18,371
Diseases of eye	27,184	30,022
Dysentery and Diarrhoea	7,394	7,450
Ulcers	15,280	17,439
Skin diseases	23,578	21,616 including diseases caused by nails.
Syphilis	1,030	983
Injuries	11,032	7,734
Tuberculosis of lung	533	516
Abscess of the liver	18	22

42 REPORT ON SANITATION, DISPENSARIES AND JAILS IN RAJPUTANA FOR 1937

During the year the total number of surgical operations of all kinds performed was 10,917 with 11 deaths as against 11,566 with 22 deaths in the year 1936 as follows :—

Dispensaries.	1936.	1937.	Difference.
Victoria Hospital, Ajmer	2,517	2,597	+80
Kekri	1,083	847	—236
Pisangan	461	464	+3
Bhinai	716	627	—89
Masuda	412	408	—4
Beawar	3,623	3,114	—509
Todgarh	411	388	—23
Ajmer Municipal Dispensary	1,501	1,551	+50
Ajmer Police Hospital	280	226	—54
Deoli Charitable Dispensary	562	695	+133
TOTAL	11,566	10,917	—649

The number of important operations performed in the year 1937 as compared with that of 1936 is given below :—

Kinds of operations.	1936.	1937.
Excision of cysts	45	42
Reduction of dislocation	31	33
Amputations	38	35
Iridectomy	14	12
Extraction of lens	57	72
Evisceration and enucleation of eye balls	13	11
Excision of eye balls	5	..
Operations mastoid antrum	10	13
Laparotomy	17	8
Lithotomy	12	10
Ovariectomy
Salpingostomy
Hysterectomy, partial or complete
Cæsarean Section	2	5
Litholopaxy	30	30
Tonsilectomy	19	11
Wiring, plating, or otherwise uniting fractured bones	259	200
Thyroid and para thyroid glands
Liver gall bladder and bile ducts	3	0
Kidney and urters	1	1
Stomach

During the year under report there were 578 cases of poisoning (including 31 by opium) and 7 deaths as against 1,083 (including 32 by opium) and 2 deaths in the previous year.

(NOTE.—Figures of deaths due to poisoning represent indoor cases only.)

Labour cases.

177 labour cases were treated during the year in the State-aided Hospitals and Dispensaries including 61 abnormal as against 153 including 48 abnormal in 1936. These figures do not include the numbers treated in the Mission Hospital and Dai Khana in Ajmer City.

In the Railway Hospital and Dispensaries at Ajmer 1,054 indoor and 36,399 outdoor patients were treated 20 major and 2,780 minor operations were performed.

Income and Expenditure.

During the year the receipts amounted to Rs. 1,23,650 (of which a sum of Rs. 55,002 was contributed by Government) and expenditure to Rs. 1,22,181 as against Rs. 1,75,749 and Rs. 1,70,937 respectively in the preceding year.

As compared with the previous year the receipts decreased by Rs. 52,099 and expenditure by Rs. 48,756.

The average cost of each case treated amounted to Rs. 0-9-9 per annum as against Rs. 0-14-6 in the preceding year.

Personnel Proceedings and office.

The post of the Chief Medical Officer, Rajputana and Civil Surgeon, Ajmer-Merwara, was held by Lt.-Col. R. Hay, I.M.S., throughout the year under report.

Dr. C. L. Anderson held the post of the Additional Civil Surgeon, Ajmer-Merwara, from the 1st January to the 5th December 1937, when he was succeeded by Dr. S. N. Eate, I.M.D.

Rai Sahib Dr. Suraj Narain Mathur and Rai Sahib Dr. Suraj Narain Agarwal were Assistant Surgeons at Ajmer and Beawar respectively. Rai Sahib Dr. Suraj Narain Mathur, Assistant Surgeon, Victoria Hospital, Ajmer, was sent for Post-Graduate training to the Government Ophthalmic Hospital, Madras, for a period of 3 months from the 1st April 1937.

The following Sub-Assistant Surgeons were incharge of the Government-aided dispensaries :—

Kekri.—Ram Ruxpal Shukla.

Bhinai.—Chagan Behari Lal.

Masuda.—Shiv Charan.

Pisagan.—Bansidhar.

Todgarh.—Balwant Singh.

Municipal Dispensary, Ajmer.—Rai Sahib Dr. Govind Lal, holder of Kaiser-i-Hind medal II Class.

Police Hospital, Ajmer.—Messrs. Mohammad Usman and Nasiruddin.

Charitable Dispensary, Deoli.—Khurshed Hussain.

R. KHAREGAT, LT.-COL., I.M.S.,

Civil Surgeon, Ajmer-Merwara, Ajmer.

Brief Report on the Working of the Antirabic Treatment Centre, Victoria Hospital, Ajmer, for the year 1937.

The total number of patients who under-went antirabic treatment at the centre during the year 1937 was 258.

Following is the classification of patients according to the district to which they belong showing the number of indigent and self-paying patients treated during the year under report :—

	Indigent.	Selfpaying.	Total.
1. Cases from Ajmer Municipal area	34	5	39
2. Cases from Ajmer-Merwara	140	18	158
3. Cases from outside (viz., States)	47	14	61
TOTAL	221	37	258

The number of patients according to nationality and sex treated during the year 1937 was as under :—

Nationality.	ADULTS.		CHILDREN.		Total.
	Male.	Female.	Male.	Female.	
Europeans and Anglo-Indians	3	3	6
Hindus	116	13	52	8	189
Mohammadans	38	5	14	4	61
Others	1	..	1	..	2
TOTAL	158	21	67	12	258

Following is the classification of the patients according to the severity of their wounds :—

	Adult.	Children.	Total.
I. Lick cases	7	..	7
II. Superficial wounds	16	16	32
III. Superficial extensive wounds	134	43	177
IV. Deep extensive wounds	18	11	29
IV-B. Wounds on neck and head	5	8	13
TOTAL	180	78	258

The number of patients who underwent the full course of treatment was 232. The number of patients who did not complete the full course of treatment was :—

	Ajmer.	Ajmer District.	Outside.
Absconded	8	16	2
Died
Transferred to Kasauli
Completed	31	142	59

From 12th July 1935 this centre has been authorised by Kasauli to treat all classes of cases, hence no case was transferred to Kasauli during the year under review. Classification of the animal which bit, scratched or licked the patients :—

	Name of animal.	Number of cases.
Dogs	216
Jackals	31
Others	11
	TOTAL	<u>258</u>

Patients coming from Ajmer-Merwara are charged at the rate of Rs. 11 per patient (*viz.*, Rs. 6 for vaccine and Rs. 5 for the centre charges) while patients from the States are charged at the rate of Rs. 13 per patient (*viz.*, Rs. 6 for the vaccine and Rs. 7 for the centre charges). Anti-rabic treatment charges of indigent patients are recovered from the authorities who send them while those from the patients who can afford to pay are levied direct at the centre.

Diet charges to poor patients and their attendants (at the rate of 0-6-0 per day to an adult and 0-3-0 per day to a minor) are paid from this centre on the authority of the officer who sends them and the amount spent on diet is recovered with other bills from the authority sending patients for treatment.

R. KHAREGAT, Lt.-Col., I.M.S.,

Civil Surgeon, Ajmer-Merwara, Ajmer.

PART II.

SECTION II.

Hospitals and Dispensaries in Indian States of Rajputana.

The year started with 145 Hospitals and Dispensaries in the Rural and 132 in Urban areas of all States in Rajputana.

4 new dispensaries were opened as shown below :—

	Rural.	Urban.
Kotah State	1	..
Mewar State	1	1
Bundi State	1	..

There were thus 148 Hospitals and Dispensaries in existence in the Rural and 133 in the Urban areas at the close of the year.

The strength and distribution of medical personnel in the Rajputana States for Rural and Urban areas were as under :—

	Rural.	Urban.
1. Indian Medical Service Officers	3
2. Women Medical Service Officers
3. Indian Medical Department Officers	2
4. Assistant Surgeons	8	80
5. Sub-Assistant Surgeons	63	241
6. Lady Doctors	27
7. Compounders	93	505
8. Nurses, European and Anglo-Indian	80
9. Nurses, Indian	3	62

The table below shows the comparison of total number of patients both indoor and outdoor treated in the Hospitals and Dispensaries of the States during the years 1936 and 1937 :—

Year.	CASES TREATED.		Total.	DAILY AVERAGE.		Percent- age of indoor to total treated.	Deaths of indoor.	Percent- age of death to in- patients.
	Indoor.	Outdoor.		Indoor.	Outdoor.			
1936	40,382	3,605,497	3,646,070	1,977.20	37,112.84	1.11	1,349	3.32
1937	42,808	3,983,997	4,026,805	1,994.27	27,407.40	1.06	1,314	3.06

The number of in-patients and out-patients increased by 2,226 and 378,500 respectively.

The comparative table below shows the number of both indoor and outdoor patients treated in the hospitals and dispensaries of States according to classes and sexes.

Class.	1936.			1937.		
	Male.	Female.	Total.	Male.	Female.	Total.
Europeans and Anglo-Indians	1,546	805	2,352	1,435	657	2,092
Hindus	1,870,867	835,000	2,706,473	1,841,133	832,492	2,673,625
Mohammadans	607,248	313,478	920,726	622,280	298,046	920,326
Others	35,023	21,577	56,600	33,827	20,184	54,011
TOTAL	2,474,684	1,171,767	3,646,451	2,398,675	1,152,679	3,551,254

The subjoined table shows the figures of the chief diseases treated in hospitals and dispensaries as compared with those of the previous year.

Name of disease.	1936.	1937.
1. Malarin fever	433,217	453,846
2. Diseases of eye	610,012	623,440
3. Dysentery and Diarrhoea	64,328	78,109
4. Ulcers	251,203	285,152
5. Skin diseases	497,003	471,311
6. Syphilis	15,865	13,823
7. Injuries	173,020	191,520
8. Tuberculosis of lungs	5,697	7,518
9. Abscess of liver	1,915	216

During the year 194,032 operations of all kinds with 210 deaths were performed in hospitals and dispensaries as against 177,927 with 152 deaths in the year 1936, showing an increase of 16,105.

The subjoined table shows the number of operations performed during the year compared with that of 1936.

Kind of operation.	1936.	1937.
Excision of cysts	316	735
Reduction of dislocation	722	853
Amputations	293	785
Rhinoplasty	20	..
Artificial pupil	154	..
Iridectomy	196	554
Extraction of lens	2,168	5,163
Evisceration of eyeballs	100	55
Operations on mastoid antrum	98	162
Laparotomy	34	..
Hernia, radical cure	93	187
Removal of hæmorrhoids	304	..
Incision or excision of anal fissure and fistula	181	294
Lithotomy	113	231
Ovariectomy	24	..
Salpingostomy	2	26
Hysterectomy, partial or complete	48	64
Cæsarean	12	15
Litholopaxy	165	318

Poisoning cases.

During the year under review there were 12,750 cases of poisoning (including 393 by opium) with 27 deaths in comparison with 12,761 cases (including 577 by opium) with 34 deaths in the preceding year.

Out of the total number 1,342 cases occurred in Jaipur, 618 in Marwar, 977 in Mewar, and 845 in Bikaner.

Labour cases.

The number of labour cases treated in hospitals and dispensaries during the year was 2,912 including 628 abnormal, as against 3,325 including 959 abnormal last year.

Income and Expenditure.

During the year 1937 the expenditure on hospitals and dispensaries in the Indian States of Rajputana was Rs. 32,40,097 (including a sum of Rs. 14,57,579 on account of construction of new building at Bikaner) as against Rs. 16,45,716 in 1936. The average cost of each case treated was Rs. 1-4-0 as against 0-7-2 in the previous year.

Miscellaneous.

The Canadian Mission Hospital, Banswara, continued to be satisfactorily maintained at a cost of Rs. 11,000 for the year 1937.

Statistics are as follows :—

1. Out-patients :—	
(i) New patients	14,536
(ii) Return visits	15,660
2. Daily average of out-patients	80
3. In-patients	986
4. Daily average of In-patients	30
5. Average days in Hospital	11
6. Operations (major and minor)	541
7. Laboratory examinations	354
8. Vaccinations	1,694

Personnel proceedings and office.

During the year under report charge of the post of Chief Medical Officer, Rajputana, was held by Lt.-Col. R. Hay, I.M.S.

The names of officers who remained incharge of the posts of Residency Surgeon, State Surgeons and Chief Medical Officers during the year under report are given below :—

- Alwar.*—Captain M. S. Katre, M.R.C.S., N.R.C.P., D.O.M.S., M.B.B.S.
Banswara.—Doctor Harbans Singh Trawn, M.B.B.S.
Bharatpur.—Captain Maha Nand Sardana, M.B.B.S., L.R.C.P., M.R.C.S., D.T.M., D.O.S.M., F.R.C.P.S., A.I.R.O.
Bikaner.—Mr. A. F. Lasrado, F.R.C.S. (England).
Bundi.—Doctor D. N. Ahluwalia, M.B.
Dholpur.—Rai Sahib Doctor Suraj Mal Sarin.
Dungarpur.—Doctor K. D. S. Rao, M.B.B.S.
Jaipur.—Lt.-Col. J. P. Huban, O.B.E., I.M.S.
Jaisalmer.—Doctor D. U. Deve, M.B.B.S.
Jhalawar.—Sahas Bhushan Captain Parmanand Bhatia, M.B.B.S.
Karauli.—Doctor S. N. Malhotra, M.D.F.C.P.S., M.B.B.S.
Kishangarh.—Doctor Amritlal Bapna, M.B.B.S.
Kotah.—Rao Sahib Doctor Vidya Shankar, L.M. & S.
Marwar.—Mr. E. W. Hayward, F.R.C.S.
Mewar.—Lt.-Col. W. P. Hogg, D.S.O., M.C., I.M.S.
Palanpur.—Mr. Shrinivas Sita Ram Hajare, M.B.B.S.
Partabgarh.—Doctor Jivanlal P. Parekh, L.M. & S.
Shahpura.—Doctor Kushal Singh, L.M.P. (C.P.) and L.T.M. (Calcutta).
Sirohi.—Doctor R. D. Shiali, L.M.&S., Vaidya Ratan.

Tonk.—Doctor Ram Mansoor, M.D., D.P.H. and Khan Bahadur Doctor Tasadduq Hussain, M.D.

Mount Abu.—(1) Doctor L. B. Cooper, I.M.D.

(2) Lt. G. H. Lawrence, I.M.D.

(3) Doctor Gokaran Das Baijal, M.B.B.S.

Pachbhadra.—Doctor Maha Narain.

Sambhar.—Doctor G. B. Smart.

Bharatpur Agency.—Doctor L. H. Biswas.

Jaipur Residency Hospital.—Doctor Samuel K. Malvia.

Kotra Agency.—Doctor Mohammad Usman.

Mewar Bhil Corps Hospital, Kherwara.—Doctor Bansi Dhar and Doctor Kunj Behari Lal.

JOHN P. HUBAN, Lt.-Col., I.M.S.,

Administrative Medical Officer in Rajputana.

PART II.

PART III.—JAILS.

SECTION I.—AJMER JAIL.

PART III.

SECTION I.

Review of the Annual Administration Report of the Central Jail, Ajmer, for the year 1937.

General.—The charge of the office of the Superintendent, Central Jail, Ajmer, was held by Lt.-Col. R. Hay, I.M.S., throughout the year.

2. At the beginning of the year there were 352 prisoners including 85 under-trial, while at the end of the year there were 335 prisoners including 59 under-trial.

3. The number of prisoners admitted during the year was 1,519 as compared with 1,626 in the previous year. Of these 564 were convicts, 939 under-trial and 16 civil prisoners. There was an increase in the daily average of prisoners as shown below, a decrease in that of under-trials, and an increase in civil prisoners.

	1936.	1937.
Convicts	262	269
Under-trials	87	73
Civil Prisoners	2	60

4. The following table shows the disposal of convicts during the year under review as compared with the preceding year :—

	1936.	1937.
Released on appeal	58	51
Released on expiry of sentence	294	286
Released on Payment of fine
Released on account of sickness	3	..
Released under rules for remission on account of good conduct	173	151
Transferred to other Jails	40	63
Transferred to Mental Hospital	1
Died in Jail	1	1
Escaped
Executed	2
Released under Jail delivery rules and on remission of sentences by Local Government
Sent to Courts for trial	4	..
Sent to Victoria Hospital for treatment	1	..

5. The classification by religion of the 523 convicts imprisoned during the year is as under :—

Indian Christian	2
Mohamedans	164
Hindus	242
Other classes	115

The total comprises 503 males and 20 females.

6. Of these 523 prisoners 63 were awarded simple imprisonment, 456 rigorous imprisonment and 4 rigorous imprisonment with whipping.

7. *Previous convicts.*—The number of previous convicts admitted during the year was 181 as compared with 191 in the previous year; i.e., 34.6 per cent. of the prisoners admitted during the year under review were previous convicts as compared with 37.15 per cent. in the previous year.

8. *Employment of convicts.*—Excluding sick and convalescent prisoners from whom occasional labour was taken, the average daily number of convicts sentenced to labour was 264.59.

9. *Conduct of prisoners.*—The number of jail punishments of all kinds inflicted was 78, a notable decrease on the 147 during the preceding year. All these were dealt with by the Superintendent, Central Jail. Corporal punishment was inflicted on 2 prisoners.

10. *Escapes.*—There was no escape during the year.

11. *Health.*—There were 2 deaths. The number of prisoners admitted to the Jail hospital was 123. The previous year's figure was 142. Of the convicts passing out of the Jail during the year 254 (51·7 per cent.) gained weight in the jail, 100 (20·6 per cent.) lost weight and 137 (27·9 per cent.) remained about the same.

12. *Juvenile prisoners.*—At the beginning of the year there was no juvenile prisoner. Eighteen were received during the year under review, out of which 14 were released leaving 4 at the close of the year.

Juvenile prisoners were on release invariably made over to their lawful guardians or to the Police to be sent to their homes. Juveniles are confined in separate cells during the night.

13. *Jail manufacture.*—According to the *pro formâ* account the gross earnings from Jail manufactures amounted to Rs. 1,544-11-10 as compared with Rs. 2,463-7-3 in the previous year. The decrease is due to the fact that fewer orders were received during the year.

14. *Guarding and maintaining.*—The total expenditure incurred in guarding and maintaining the prisoners including those under-trial amounted to Rs. 47,476-13-11 as compared with Rs. 44,412 last year. The average cost per prisoner in the jail during the year under review was Rs. 131-10 as against Rs. 126-7 in the preceding year. The increase is under the heads Dietary and Hospital charges which is mainly due to the special and extra diets given in concentrated form to 18 detenus of the Deoli Detention Jail transferred to undergo their sentences under section 52 of the Prisoners Act. Unfavourable rates of articles of food also account for the increase.

15. The garden supplied for prisoners 565 maunds 16 seers and 10 chatacks of vegetables valued at Rs. 1,414-2.

B. J. K. HALLOWES,

*Commissioner and Inspector-General
of Prisons, Ajmer-Merwara.*

STATEMENT No. I.

Showing the Number and Disposal of Convicts in the Central Jail at Ajmer for the year 1937.

1	2	3	4	5	6	7	8	9				10				11	12	13	14	15	16
Sex.	Total aggregate number of prisoners during the year.	Daily average number of prisoners.	Remained on the last day of year.	Imprisoned during the year.	Total.	RECEIVED FROM OTHER JAILS.		Total population.	TRANSFERRED TO OTHER JAILS.				RELEASED DURING THE YEAR.				Transported beyond seas.	Transferred to Lunatic Asylum.	Escaped.	Died.	Remained on the last day of the year.

TOTAL	98,104	268.94	207	583	789	32	0	828	63	..	61	286	1.41	1	..	2	1	211

* Of this number 17 boys under 16 years.

† Of this number 1 girl under 16 years.

NOTES 1.—This and the other statements numbered 1 to 7 only convicted prisoners are to be included.

2.—Debtors and others detained for default of Government Revenue will appear in number 8.

3.—The "Total", column 6, is obtained by adding together the totals of columns 4 and 5, and represents with sufficient accuracy the number of different individuals who have been in the prison during the year.

4.—The "Total population", column 8, is the sum of column 8 and 9, and represents the number presented on each day of the month, and the number of days in the month.

5.—The "Daily average number of prisoners", column 3, is obtained by dividing the total population by the number of days in the month.

6.—When prisoners are transferred from one jail to another on their way to undergo transportation beyond seas, they should be entered by the transferring jail in column 8-B, and by the jail which received them they should be entered in column 11. It will be observed that transportation applies only to those prisoners sent beyond seas. Transportation to a Central Prison is recorded merely as a transfer.

7.—When the first are employed abroad under the order of Government No. 1622-65, dated 10th October 1961, they should be considered as forming a separate jail, and the name of the place where they are employed, should be entered in column 11.

Showing the Religion, Age and Previous Occupation of the convicts in Jail at Ajmer for the year 1907.

NOTE.—It is of importance that the particulars given to this, and also in No. 3, should not include the same individual more than once, and hence all transfers should be omitted. The totals should correspond with the number in column 6, statement 1, "Discharged during the month". But they should do so with the "Total" column 6, for January only, as the number remaining on the last day of the previous year (31st December) is to be included in that month.

NOTE.—It is of importance that the particulars given to this, and also in No. 3, should not include the same individual more than once, and hence all transfers should be omitted. The totals should correspond with the number in column 6, statement 1, "Discharged during the month". But they should do so with the "Total" column 6, for January only, as the number remaining on the last day of the previous year (31st December) is to be included in that month.

STATEMENT III.

(The female column should be filled in italics.)

Showing the convicts admitted into the Jail at Ajmer during the year 1937 and those remaining on the 31st December of that year, according to the nature and length of sentence.
